

KÄRCHER

makes a difference

THE RACE IS ALWAYS WON IN THE CORNERS.

The extremely agile and mobile compact scrubber drier.

BR 35/12 C BP

Extremely agile and mobile

Thanks to the innovative steering concept KART (Kärcher Advanced Response Technology), the BR 35/12 C Bp can clean adjacent to the wall at a 90° angle. If required, it can also do so in reverse. The height-adjustable (telescoping and folding) steering column allows operators of any size to set their ideal working position. The folding steering column makes it easy to secure for transport. Eyelet points are provided and highlighted on the device to provide assistance with this.

1 Perfect means simple and clean

- The fresh water distributor strip of the BR 35/12 C Bp is easy to access and easy to clean. Remounting of the suction lip is easy when changing.

2 Performance is all a matter of setting

- Depending on the floor texture and the task at hand, the contact pressure of the BR 35/12 C Bp can be adjusted in four steps. The machine's handling is adjusted accordingly: the higher the contact pressure, the faster the speed.

3 Taking efficiency to the next level

- Kärcher's unique eco:efficiency mode represents a milestone on the path toward sustainability. This environmentally friendly setting utilizes energy and resources intelligently and efficiently. It eliminates power consumption, reducing emissions, and it reduces water consumption, resulting in less waste water. It also features an extended run time mode, increasing operation by 50%, and reducing noise by approximately 40%.

4 Brush replacement made easy

- The BR 35/12 C Bp's brush can be replaced with no tools at all, in a matter of seconds, making it easy to always mount the right brush for the job, or to replace a worn brush. Saving lots of time, every time. And that adds up.

5 Color trends for safe operation

- Yellow panels mean daily maintenance. Gray panels highlight service points. The standardized Kärcher Color coding eliminates any confusion and possible oversights.

6 Quick disposal

- The dirty water tank of the BR 35/12 C Bp is easy to detach and can be emptied in practically any available drain.

Technical data and equipment

The roller brush head of the new BR 35/12 C Bp is an outstanding technical innovation: It can be horizontally rotated 200° in both directions around the steering axle. This means that every part of the full circle is covered, finally eliminating blind spots when cleaning. In the parking position, all pressure is taken off the brushes to prevent any damage.

BR 35/12 C Bp

- KART (Kärcher Advanced Response Technology) steering
- Pivoting cleaning head
- Light weight - 77 lbs
- eco!efficiency

Technical data

Brush working width	inches	14"
Vacuum working width	inches	18"
Area performance	ft² / h	15,069
Intake performance	W	500 W
Fresh water/waste water tank	gallons	3 / 3 gallons
Brush speed	rpm	700 - 1,500 rpm
Weight (including battery)	lbs	77 lbs
Dimensions (L x W x H)	inches	39" x 18" x 51"

Equipment

Product	Order No.	Description
BR 35/12 C Bp	1.783-454.0	14" scrubber with roller brushes

Accessories

	Order No.	Description
■	4.037-031.0	Roller Brush, red, medium
□	4.037-036.0	Roller Brush, white, soft
□	4.037-037.0	Roller Brush, orange, high/low
□	4.037-038.0	Roller Brush, green, hard
□	4.037-039.0	Roller Brush, black, very hard
□	4.762-009.0	Roller Pad roller shaft
□	6.369-053.0	Roller Pads on sleeve, yellow, soft
□	6.369-047.0	Roller Pads on sleeve, red, medium
□	6.369-052.0	Roller Pads on sleeve, green, hard
□	4.037-040.0	Microfiber roller
■	4.037-035.0	Suction Lip Set, standard, oil-resistant, polyurethane
■	6.654-294.0	Lithium-Ion Battery, 21 Ah

■ Included □ Optional
